PROFILE

I am a passionate and skilled frontend developer with a strong foundation in creating dynamic and responsive web applications. With a deep understanding of modern web technologies and a keen eye for design, I strive to deliver seamless user experiences that are both visually appealing and highly functional. My expertise in HTML5, CSS3, and JavaScript, combined with proficiency in frameworks like React, allows me to build scalable and maintainable codebases.

PROJECTS

MailBox Client
Build using React JS

- Description: Designed a React.js based email application with Firebase backend, featuring user friendly authentication, inbox, sent, and compose functionalities.
